4.KC Series

STANDARD SWIVEL JOINTS

1.Type A

2.Type B

3.Type C

4.Type AS

5.Type CS

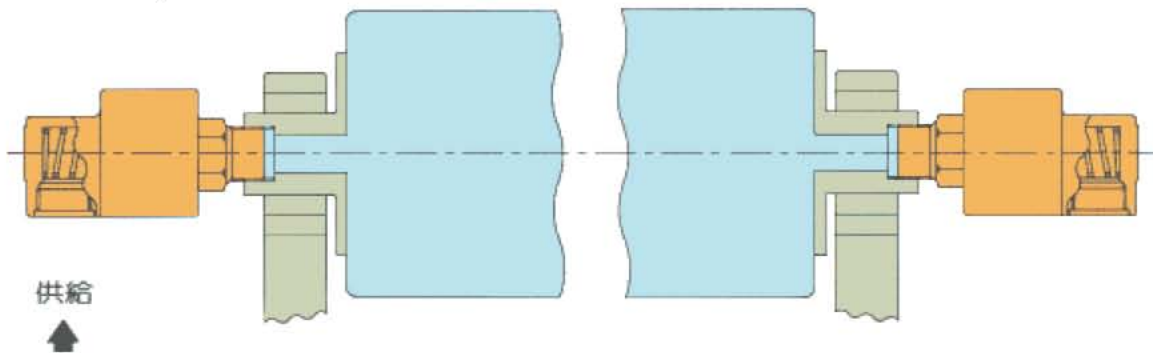

APPLICATIONS

1. Simplex

Used to supply a fluid (water, oil or steam) into a roll from one end and discharge it from the other end where both ends of the journal are available.

Example:

Rolls for iron manufacture machines, Film cooling and take-up roll, Paper calender, etc.

2. Duplex, Stationary Internal Pipe

Where only one end of the journal is available, a fluid is supplied from one end of the roll and discharge it from same end.

Example: for Water or Thermoil

Plastic extruder, Film cooling and take-up roll, Rubber kneading machine, etc.
